

## **Mobile Jaw Crusher**

### **Mobile Jaw Crusher Plant has high output with low power consumption**

Welcome to Shibang , **mobile jaw crusher plant** comes in all shapes and sizes and can be made up of many different kinds of equipment. When it comes to portable and mobile crushing plant, Recycling attachments, aggregate plant and industry grinding mill plant, count on Shibang as your single source supplier for equipment.

Shibang has been serving the aggregate industry for over 10 years, it is one of the most famous rock and mineral processing company in the world, the portable crushing plant concept designed by Shibang is fully adaptable to all mobile crushing needs.

### **The excellent performance of portable type series mobile jaw crushing plant:**

1. High performance jaw crusher.
2. Vehicle electric generating set, motors and control box are all included.
3. High crushing ratio, powerful crushing.

### **Mobile Jaw crusher application and excellence**

Our methodologies are built on a systems approach to the design and implementation of solutions, and underpinned by deep process knowledge.

The portable plant term for sand, gravel and stone, which can be used to make concrete amongst other things. They can be compacted to firmly fill a space and are often bound together with cement, to make concrete or bitumen, to re-surface roads.

This crushing plants incorporate all the crushing plants into one which eliminate the work to install the basic facilities in the bumpy ground when you use the independence crushing plants, reduce the cost of the material and man-hour. This reasonable and compact arrangement of the equipments improves the flexibility to set-up these machines.

### **Mobile Jaw crusher Flexible maneuverability**

This plant is more conducive to locate in the reasonable region of the crushing sites, which provides more flexible space and reasonable layout for the crushing process flow.

### **Reduce the cost of transporting material**

Shibang Mobile Jaw Crusher plant is able to achieve on-site crushing, avoid transporting material, which reduces the cost of transporting material for off-site crushing.
